## Haeundae's New Year budget for 2021

Haeundae's budget for 2021 is 653.5 billion won. Compared to the 2020 budget of 590.5 billion won, it is an increase of 10.67%, or 63 billion won. This year, the budget will be invested with an emphasis on an eco-friendly safe-living city, customized job support, health welfare for residents, and realization of a future-oriented transportation system. In particular, in order to overcome the employment crisis and the economic downturn caused by the aftermath of COVID 19, there are plans to create a lot of public jobs and customized jobs for the socially underprivileged such as women who have had their careers interrupted.

## Traffic congestion in Haeundae improves dramatically

The city of Busan recently confirmed plans to extend Busan Subway Line 2 from Jangsan Station, the last station, to Osiria Tourist Complex. In addition, Korea Railroad announced that it will open a new KTX line between Haeundae and Cheongnyangni at the end of 2022. This is the result of Haeundae's active efforts to establish Haeundae as a high-speed train station. When this high-speed train starts operations, it will travel from Haeundae to Cheongnyangni in Seoul in 2 hours and 50 minutes. Haeundae expects the extension of Line 2 and the opening of the KTX route to relieve traffic congestion and help vitalize Busan tourism.

## Haeundae Green City : the new name of Haeundae's new city

Haeundae was selected as 'Haeundae Green City' as a result of entering a contest for a new city brand in Jwa-dong New City. The contest received 1,605 entries, and the winner was selected after three evaluations and surveys. Haeundae revealed the reason why Green City was chosen, explaining that although the new city seems to be densely populated with apartments, it is a green city containing Jangsan and Chuncheon, and a city leading the Green New Deal era with hydrogen fuel cell power generation facilities.

2021

How will my neighborhood change this year?
