## HAERIDAN-GIL BECOMES BEST ALLEY IN KOREA

The Ministry of the Interior and Safety selected Haeridan-gil in Haeundae-gu, which is an exemplary case showing best practice to revitalize alleyways, as 'Best Alley'. Haeridan-gil is an alleyway behind the old Haeundae train station and has become a popular attraction for both Busan citizens and tourists with its characteristic small and unique shops. In 2019, the number of shops increased from 21 to 61, and the alley sees an average of 3,000 visitors per day. Many old and shabby houses have been remodeled and transformed into cafes, restaurants and bookstores. Haeundae-gu is the first in Busan to create a gentrification prevention ordinance and make a mutually beneficial agreement with landlords and tenants to foster the continued development of Haeridan-gil. In addition, Haeundae-gu and merchants are operating the 'Haeundae Starry Night School' to create a stage for humanities and to communicate with residents. The Starry Night School was held in 18 shops and approximately 300 residents participated in 104 courses. On the other hand, Haeridan-gil merchants recently held a Come & Play Festival and showcased more than 50 public design pieces of work such as floor paintings and murals, and also distributed eco bags to tourists who participated in the festival.

## BECOME A CELEB AT THE HAEUNDAE LIGHT FESTIVAL

The beginning of the Haeundae Light Festival, which has become a representative winter festival in Busan, was marked with the lighting ceremony which took place on November 16. The festival will be held until January 27 next year. If you enter Haeundae Square on Gunam-ro, Haeundae, you will be met by the sight of the Street of Light which is illuminated by various LED balls. The street has a tunnel of light that tells the story of 2019 and looks forward to a 2020 which is full of hope. After the tunnel, a wish tree, a photo zone, Rudolph and a snowman photo zone await visitors. The highlight of this year's festival is the 'Light Wave' at Haeundae Beach. Blue lights will create wave-like ripples on the beach, resembling the Milky Way. The 'Playground', with LED balls that change color when touched by hand, the 'Light Garden' where LED trees create a soft and glowing atmosphere, the 'Light of Photo Zone', where various photo zones are available, the Castle of Lights 'Aquamond' (from the words 'Aqua' and 'Diamond') – all these are must-see spots which you must visit. During the festival, a national carol contest and a ceremony for 100 Santa Clauses will also be held. LED lights and nighttime landscape lighting have also been installed around the River Suyeong APEC Naru Park to showcase a beautiful feast of lights. The Haeundae River Cruise LED Festival will also be held.
